

FUELING THE FUTURE WITH URANIUM

TSXV: STUD

OTCQB: STLNF

FSE: B76

SASKATCHEWAN'S ATHABASCA BASIN

*HOMETO THE WORLD'S
LARGEST HIGH GRADE
URANIUM DEPOSITS*

15% of world uranium supply¹

20x avg grade of other Uranium jurisdictions

FOCUSED ON UNDEREXPLORED SOUTHWESTERN BASIN

Significant & High-Quality Land Package

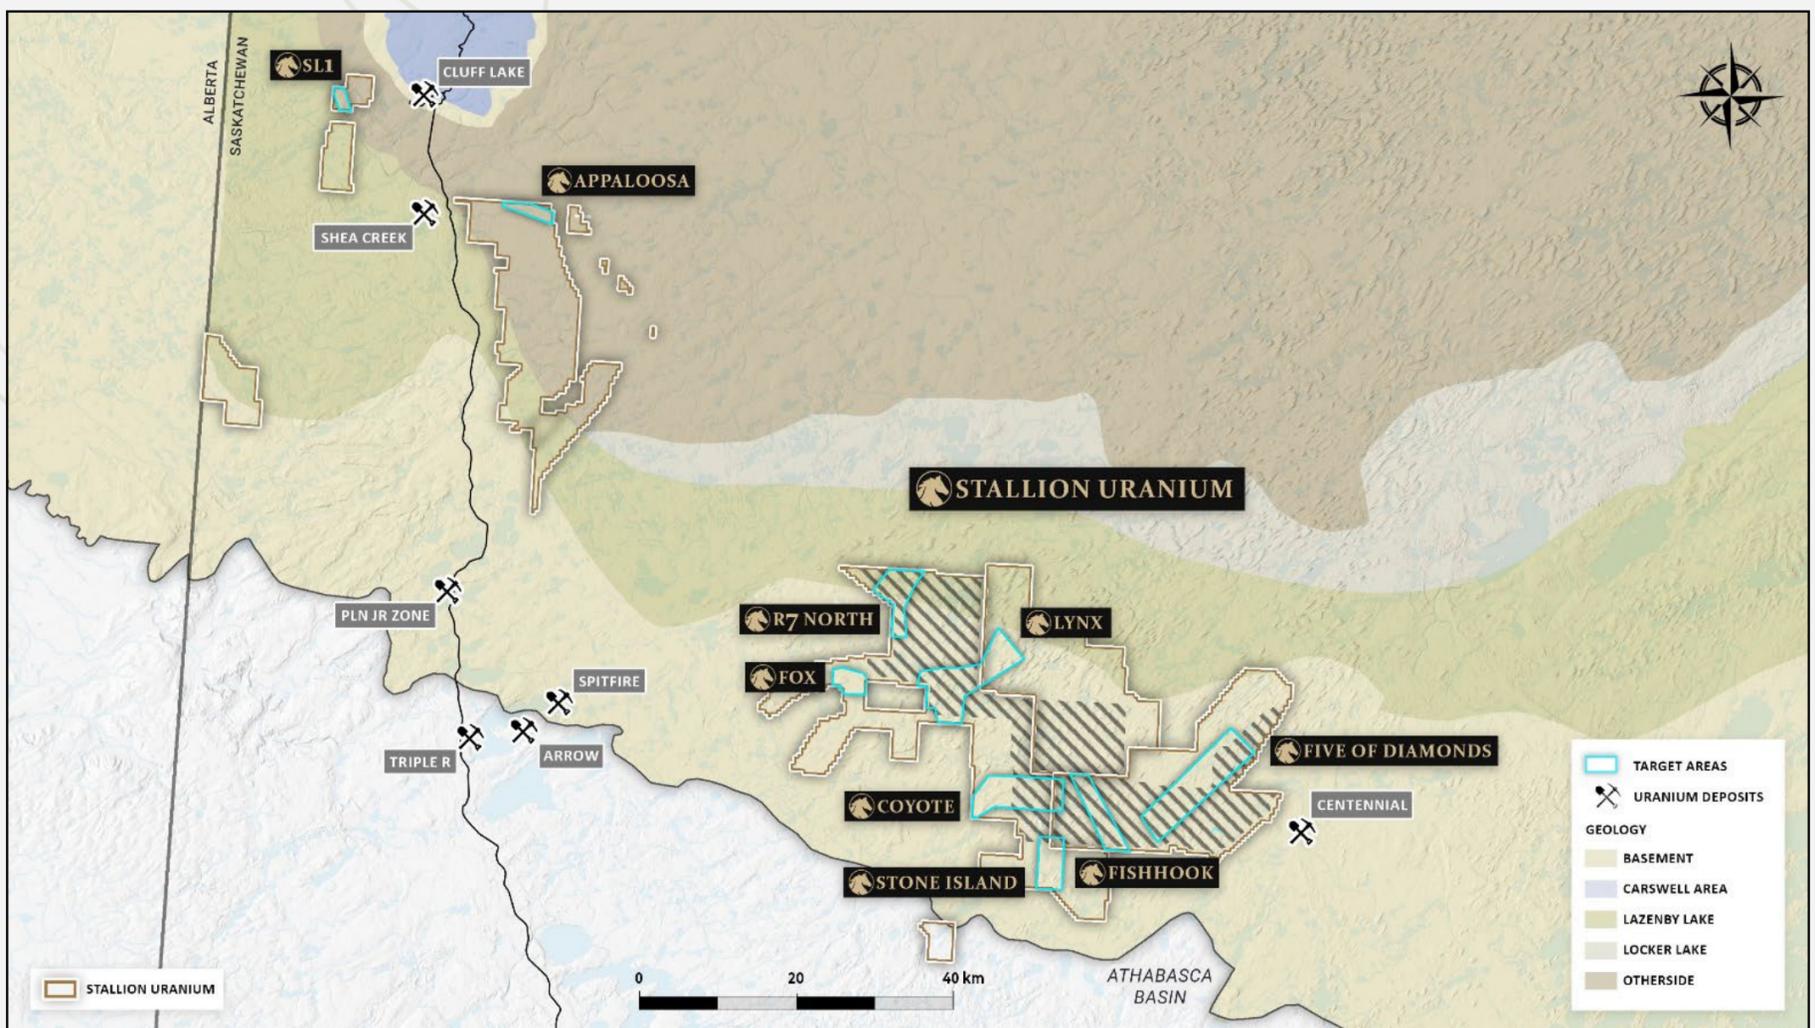

Team with Considerable Recent
Successes in the Athabasca Basin

Projects share borders with Cameco,
Orano, NexGen Energy, & F3 Uranium

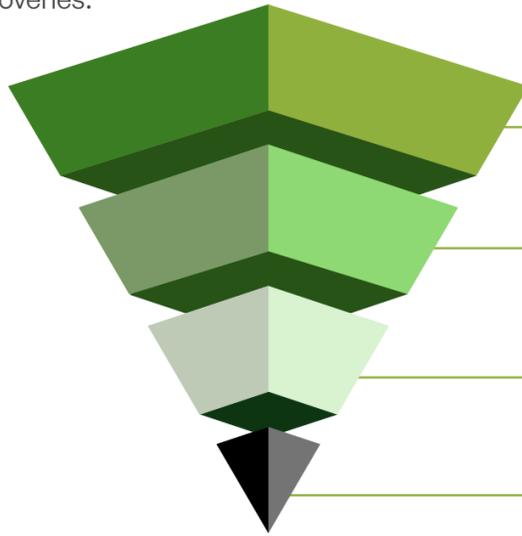

Advanced Exploration Targets with
Near Term Discovery Potential

~1,700 SQ/KM LAND PACKAGE

4 Key Features of Coyote & major Athabasca uranium discoveries:

- 1 The transition of magnetic signatures indicating favourable geological setting
- 2 Multiple strong Mobile MT or EM conductive anomalies
- 3 Structural trends interpreted from the geophysical data
- 4 Multiple gravity alteration halos confirmed in 3D gravity inversion study

Airborne Magnetics, EM
Data Compilation & Modeling

Ground Gravity, TDEM
Detailed Structural Interpretation

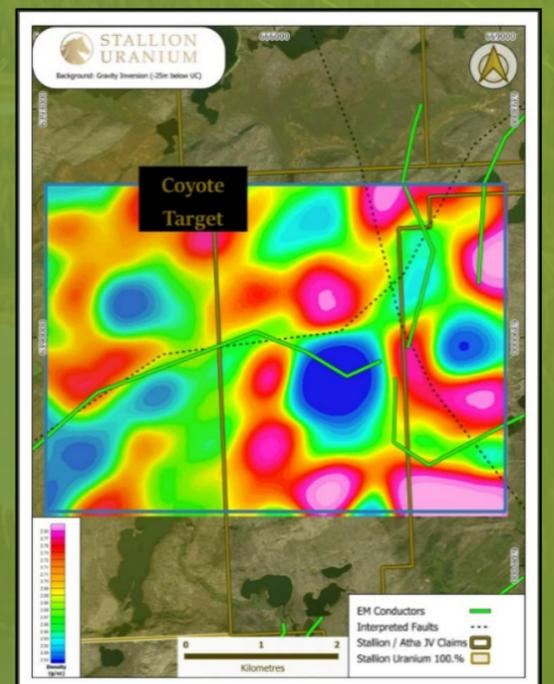

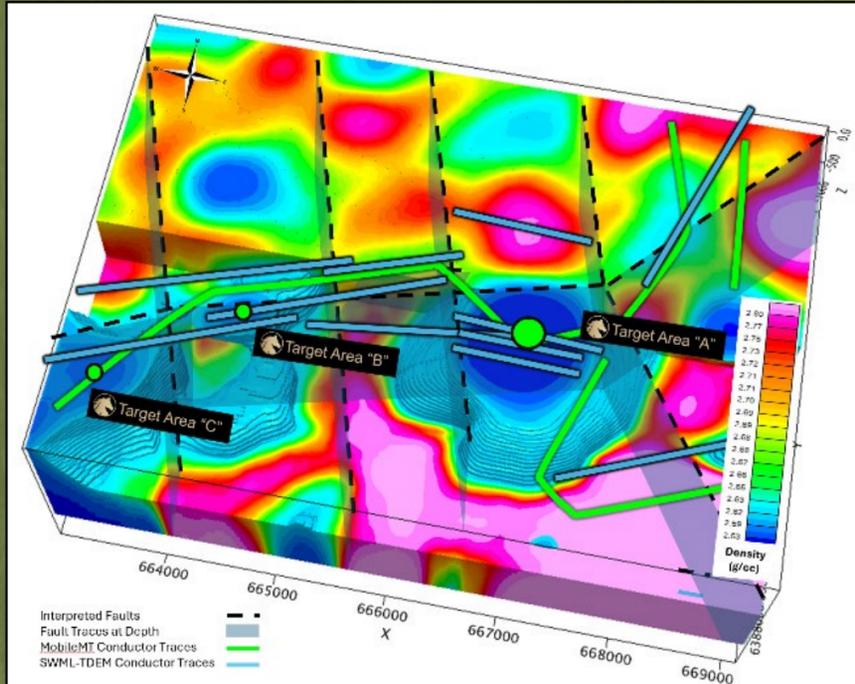

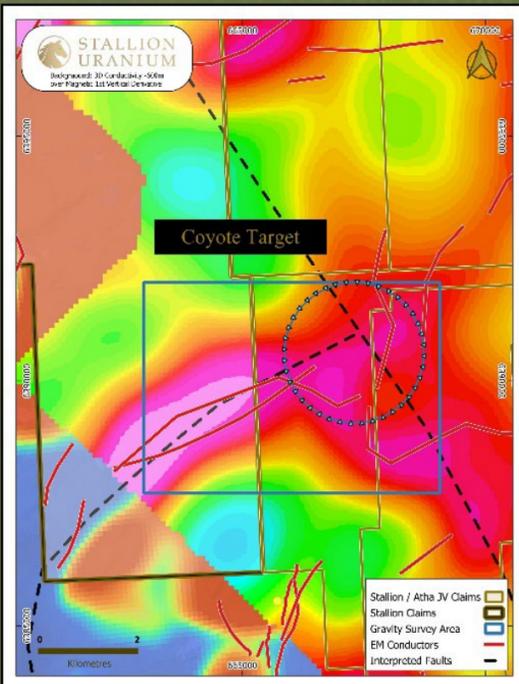

Drilling & Sampling

Uranium Discovery

Efficient - Effective - Proven

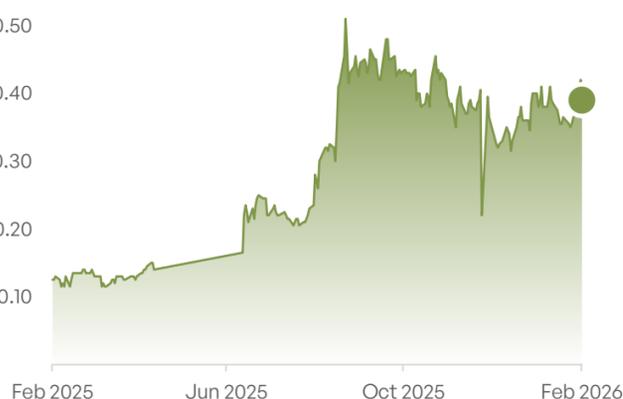

NEAR TERM DISCOVERY POTENTIAL

COYOTE - OUR HIGHEST PRIORITY TARGET AREA (TARGETS OUTLINED IN PURPLE)

CAPITAL STRUCTURE

Shares Issued & Outstanding	146,154,843	\$0.60
Warrants	85,010,564	\$0.50
Options	3,950,000	\$0.40
Fully Diluted	235,115,107	\$0.30
Share Price	\$0.375	\$0.20
Insiders & Management	~45%	\$0.10
Market Capitalization	\$54.8M
