

Disclaimer / Forward Looking Statement

This presentation contains forward-looking statements and forward-looking information within the meaning of Canadian securities legislation (collectively, "forward-looking statements") that relate to the Company's current expectations and views of future events. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions or future events or performance (often, but not always, through the use of words or phrases such as "will likelay result", "are expected to", "expects", "will continue", "is anticipated", "anticipates", "believes", "estimated", "intends", "plans", "forecast", "projection", "strategy", "objective" and "outlook") are not historical facts and may be forward-looking statements and may involve estimates, assumptions and uncertainties which could cause actual results or outcomes to differ materially from those expressed in such forward-looking statements. No assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this material change report should not be unduly relied upon. These statements speak only as of the date they are made.

Forward-looking statements are based on a number of assumptions and are subject to a number of risks and uncertainties, many of which are beyond the Company's control, which could cause actual results and events to differ materially from those that are disclosed in or implied by such forward-looking statements. The Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by law. New factors emerge from time to time, and it is not possible for the Company to predict all of them or assess the impact of each such factor or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. Any forward-looking statements contained in this presentation are expressly qualified in their entirety by this cautionary statement.

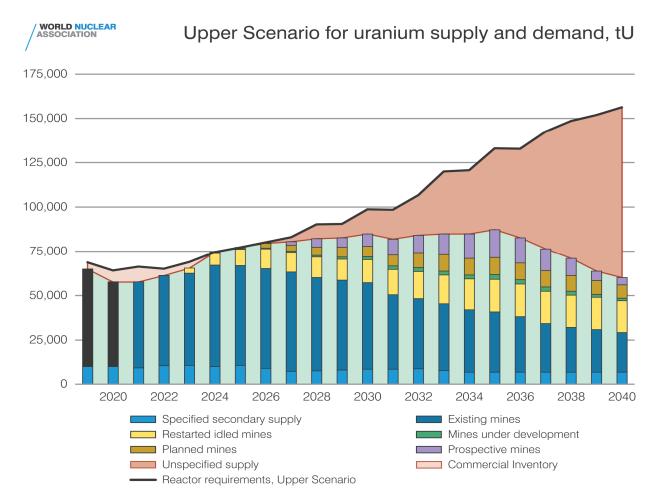

Uranium Market is Structurally Undersupplied

Stallion Uranium - Key Team Members

Matthew Schwab

CEO & Director

Mr. Matthew Schwab is an acclaimed exploration geologist and who in 2014 as the Senior Exploration Geologist at NexGen Energy Ltd. was instrumental in the discovery of the Arrow uranium deposit located in the southwestern Athabasca Basin. Mr. Schwab was also a member of the Hathor Exploration Ltd. development team and contributed to the sale of the Roughrider deposit to Rio Tinto for \$654M. And more recently served as the CFO of Kraken Energy Corp.

Darren Slugoski

VP Exploration

Mr. Slugoski holds a B.SC.
Honours degree in Geological
Sciences from the University of
Saskatchewan. He has over a
decade of experience
developing and managing
exploration programs in the
Athabasca Basin and
throughout Canada. A
significant portion was centered
on the Spitfire deposit in the
Western Athabasca Basin and
was part of the team
responsible for the Gemini
discovery in 2021.

Knox Henderson

Head of IR

Capital markets advisor for 20+ years with significant transactions and profitable exits for shareholders. Involved in numerous financings in multiple sectors and led investor communications for two significant discoveries in Canada: Great Bear Resources Dixie Project (acquired by Kinross for \$1.8 Billion) in ON and Kodiak Copper's MPD project in BC. Formerly a securities trader in the Canadian capital markets with CSC designation and holds and undergraduate in journalism.

Stephen Stanley

Board of Advisors

Mr. Stanley offers invaluable guidance from his more than 20 years experience in venture capital markets and his role as President & CEO of Hathor Exploration to discover the Roughrider deposit that was acquired by Rio Tinto for \$654M in 2012

Stallion Uranium - Completing the Team

Dong Shim

CFO

Mr. Shim's expertise is in auditing publicly traded junior mining companies and high-tech industries. Member of the Chartered Professional Accountants of British Columbia and a Certified Public Accountant registered in the State of Illinois, United States. Mr. Shim also assisted various start-up companies in achieving public listings on the TSXV, CSE & OTC.

Jay Mártin

Director

Mr. Martin. as CEO of Cambridge House, produces the largest technology and resource investment conferences in Canada and holds the largest video library of invest content in the country. With his finger on the pulse of the industry, his direction and guidance are unparalleled.

Kellv Pladson

Corporate Secretary

Mrs. Pladson has provided corporate governance and regulatory compliance services for many TSX Venture and CSE listed companies since 2009. She works closely with the company's CEO and legal counsel in maintaining corporate records. managing the day-to-day operations and ensuring the company's filings with the securities commissions and exchanges are accurately filed and in accordance with their deadlines

Drew Zimmerman

Director

Mr. Zimmerman is a **Chartered Financial Analyst** and was a Derivatives Portfolio Manager at a National Brokerage. He is committed to helping build a premier exploration company focused on Uranium in the Athabasca Basin, leveraging his experience to create value for stakeholders.

Terri Anne Welyki

Director

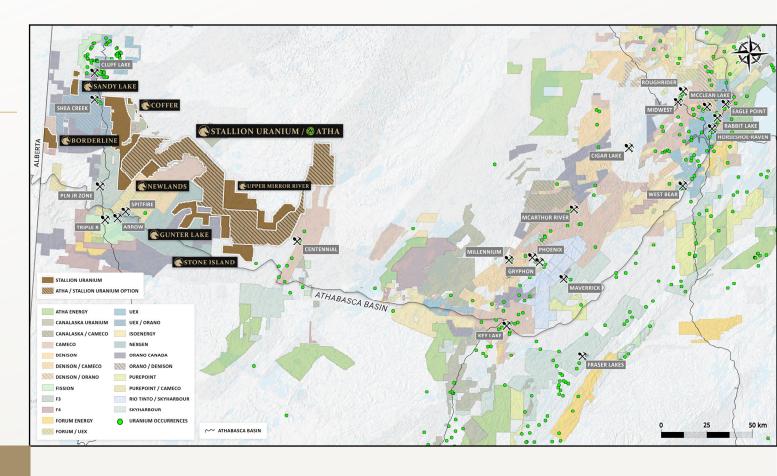

Ms. Welyki has more than 15 years of experience working with public and private mining companies, including Calico Resources. EMC Green Group S.A. and Barksdale Resources. She has broad knowledge of the mining industry, including financing, permitting, and stakeholder management and has worked across the United States, Peru and Canada.

Southwestern Basin Focused

The New Frontier of Exploration

- Analogous regionally to the stage of exploration in the Eastern Basin in the 1980s
- Underexplored with Incredible Potential
- Significant infrastructure planned with development of Arrow & Triple R

Exploring for the Next Big Deposit

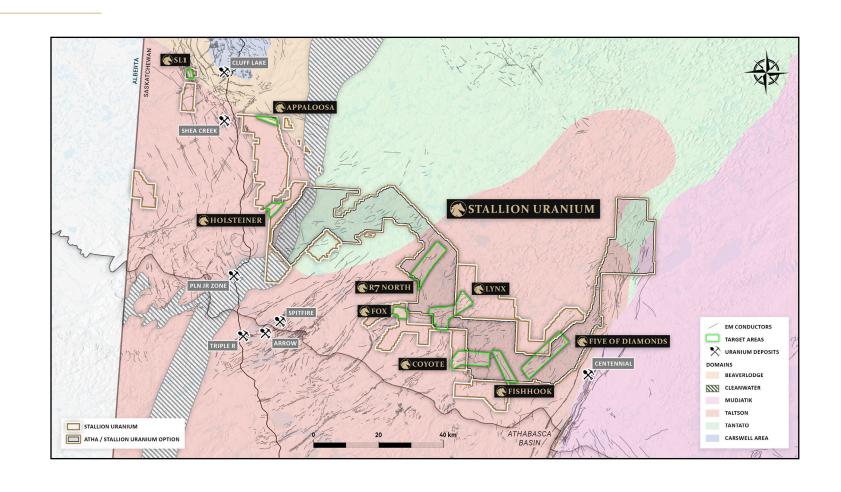

Stallion's Priority Exploration Targets

9 Tier One Targets

- Focusing on most prospective areas from over 3,000 sq km
- Targets were identified through proven exploration model
- Identified and prioritized from over 600 km of conductive trends
- Pending exploration programs focused on upgrading targets
- Drilling planned as early as H2 2025

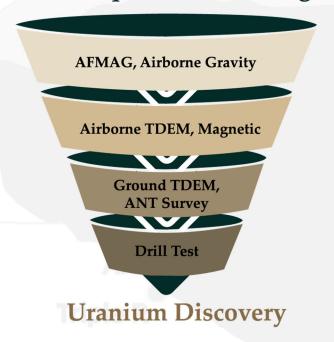

Stallion's Exploration Pathway

Drill Targeting Priorities

- Appropriate Geological Domain
- Local Uranium Showings or Deposits
- Conductive Signatures / Strength
- Magnetic Signatures
- Structural Intensity
- **Gravity Signatures**
- Sandstone Alteration / Resistivity
- Radiometric Anomalies
- Distance to Edge of Athabasca Basin
- Depth to Unconformity
- Cost of Drilling / Access to Project

FUELING THE FUTURE WITH URANIUM

3,000+ Sq/km Land Package

Regional Airborne Surveys

Locate Conductive Corridors

Upgrading Target Areas

Additional Features of Targets

Focused High Resolution

Used for Drill Targeting

Highest Conviction Targets

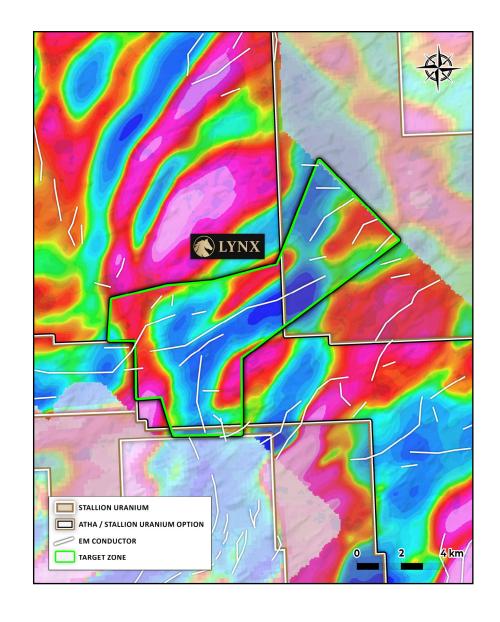

Efficient - Effective - Proven

Lynx Corridor

Lynx Target

- Extensive conductive trend over 13 km identified with MobileMT survey
- Conductor is hosted in a magnetic and gravity low indicating appropriate lithological package and alteration potential
- Hosts complex magnetic and conductive signatures which indicates an ideal trap for uranium mineralization
- Entirely untested by drilling
- Located immediately adjacent to Orano's Uchrich Project

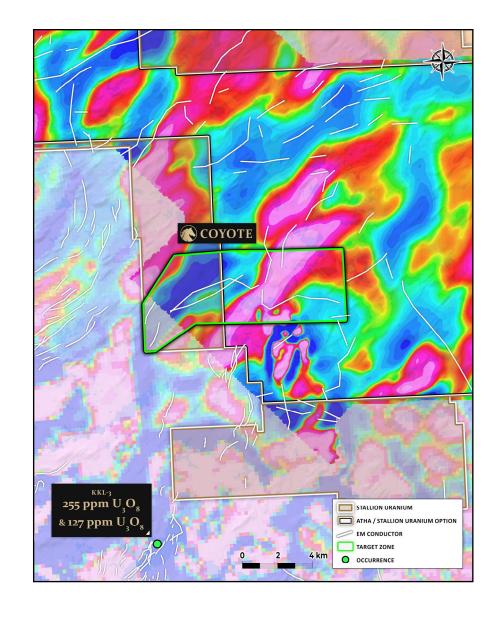

Coyote Corridor

Coyote Target

- Initially identified in Stallion's VTEMtm Plus survey in 2023
- Estimated thickness of Athabasca Sandstone is 450 meters
- Contains complex structural features identified in the geophysical surveys
- Conductors occur as an East-West trending anomaly intersected by interpreted structures
- Nearby occurrence along trend historically intersected
 255 ppm U₃O₈ and 127 ppm U₃O₈ only 12 km to south

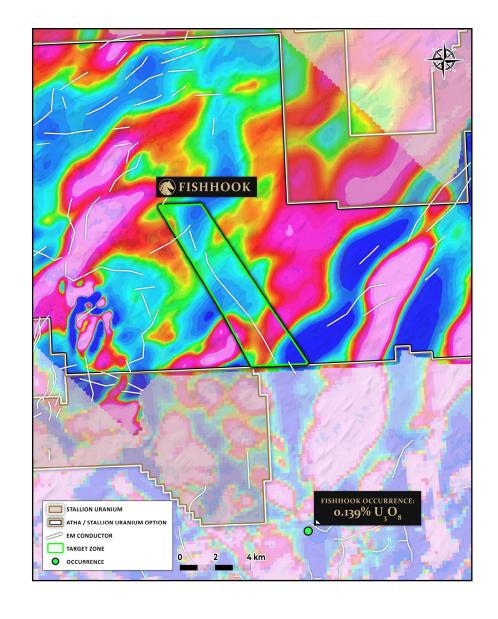

Fishhook Corridor

Fishhook Target

- Initially identified with MobileMT Survey and data modeling
- Fishhook occurrence along trend historically intersected
 0.139% U₃O₈ occurring 8 km to south
- Stallion Claim hosts 18 kms of the Fishhook Trend and remains untested with drilling
- Structurally Complex conductive trends merge into the Five of Diamonds Trend
- Evidence of massive structural corridor and cross structures, which create excellent 'traps' for hosting a uranium deposit

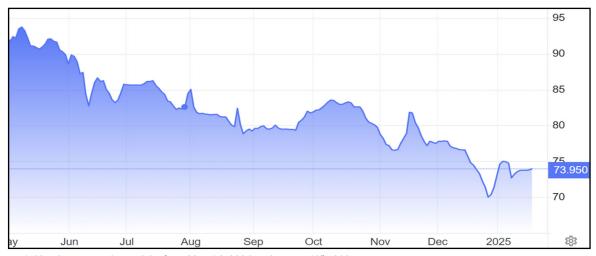

Capital Structure

Shares Issued & Outstanding	151,628,627

1. Stallion Uranium trading activity from May 1st, 2024 to January 18th, 2025

1. Uranium spot price activity from May 1st, 2024 to January 18th, 2025

*as of January 18th, 2025

Stallion's Path Forward

Our Components of Success

- Highly proven and accomplished team with strong support network
- Focus on Uranium in the most prolific and highest-grade jurisdiction in the world
- One of the largest, most prospective, and under explored land packages in the Athabasca Basin

Plans for 2025

- Continued geophysical work and target refinement at Fishhook, Coyote, and Lynx beginning in January
- Advanced geophysical surveying on 7 additional high priority targets through Q2-Q4
- Mobilization of drilling program in second half of 2025
- Continued evaluation of new opportunities to refine land package and bring additional value
